

Preserving the Past, Insuring the Future.

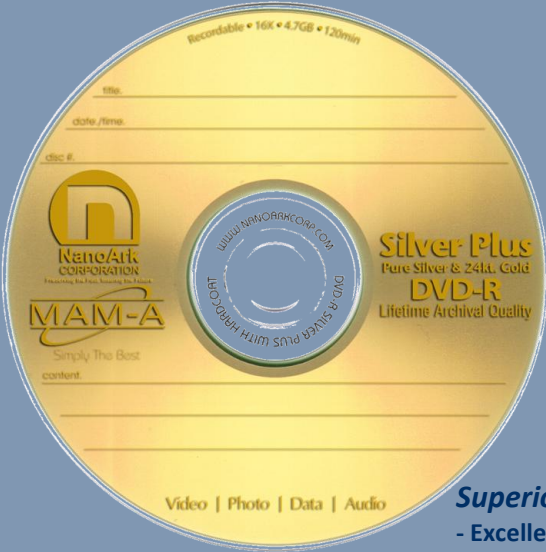

The Benefits of Gold with the Performance of Silver!!

In association with
MAM-A
Simply The Best

For your security and peace of mind!!

- Significant Cost Savings over Gold Discs
- Pure Silver + 24 Kt. Gold Layer
 - 83 Year Longevity
- Hard Coat Scratch Protection
 - Printable Surfaces
 - Custom Printing

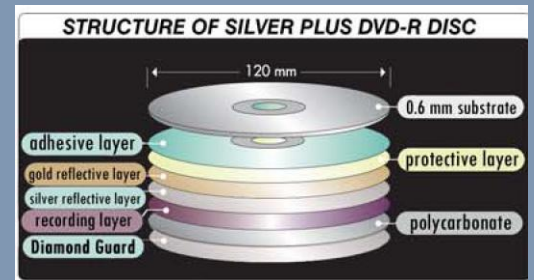

Superior Performance!

- Excellent scratch/abrasion resistance
- Excellent contamination resistance
- Excellent chemical resistance
- Excellent static charge resistance

What would you do if all your digital images were destroyed, and your CD and DVD backups were irretrievable due to disc damage from scratches????

Your insurance from deterioration over time!!

Silver Plus DVD-R feature two reflective layers, pure silver plus a second 24 kt. gold reflective layer. The pure silver layer provides high reflectivity and great drive compatibility, while the gold layer provides protection against environmental corrosion. This combination extends longevity to 83 years compared to standard silver discs that oxidize.

Diamond Guard

Recording Side Hard Coat Scratch Protection

To protect against scratches, fingerprints, and everyday handling, we apply a special protective coating called Diamond Guard to the recording side of the disc. The Diamond Guard is the hardest scratch resistant material in the industry, with a hardness rating of 5H.

Printable Surfaces and Custom Designs

Silver Plus DVD-Rs come in a wide variety of printable surfaces for a professional look. Available with inkjet and thermal surfaces, Rimage Everest, and our multi-printer compatible FlexPrint surface
